Alberg 7

Keswick Mantel

The Alberg Stove is larger than it's sister, the Norvik, and caters for those who require a larger heat output. The standard multi-fuel grate allows you to burn smokeless fuels, wood and peat.

The Alberg has a riddling grate (control visible to the left) to remove ash on the surface of the coals and boasts triple burn technology consisting of **Primary Air Burn** (control on door), **Airwash Secondary Burn** (above the door) and **Tertiary Air** (under the door).

DEFRA Approved Appliance
