

# TRAJAN 5

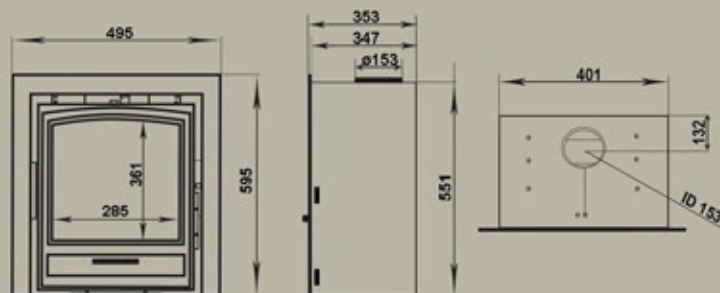

The **Trajan** is an inset **wood burning** stove designed to fit into a standard (16") fireplace opening (even with the original fireclay back still in situ).

This stove comes with a standard **3 sided black trim** (as shown) but is also available with a **4 sided trim** option to allow the stove to be fitted higher up the wall or chimney breast as a hole in the wall effect.

The Trajan benefits from a **Tertiary Air System** (this mixes pre-heated air with exhaust gases allowing the exhaust gas to re-ignite producing a cleaner and more efficient stove).

## Key Facts:

Nominal Heat Output	5.0kW
Construction	Steel & Cast-Iron
Weight	76Kg
Flue Outlet	Top (152mm) 6"
Efficiency	80%
Finish	Matt Black
